

UNIVERSITY OF MIAMI
MILLER SCHOOL OF MEDICINE

COMPREHENSIVE CENTER for BRAIN HEALTH

Are you at risk for Alzheimer's Disease ?

The University of Miami *Comprehensive Center for Brain Health* (located in Boca Raton, FL) is currently enrolling participants for a clinical trial evaluating an investigational anti-Tau vaccine designed to prevent or delay Alzheimer's disease before symptoms begin

Why Participate?

- **Proactive Prevention:** Tau Protein buildup is a primary hallmark of Alzheimer's. Early active vaccination aims to prevent this accumulation.
- **Slow Cognitive Decline:** Helping protect brain health and memory functions early.
- **Evaluate Safety:** Help researchers determine the safety and tolerability of this novel investigational vaccine.

Who May Qualify?

- Individuals ages 65-80 years who are at increased risk for Alzheimer's disease but are currently without significant memory impairment.

Costs and Expenses

- There is no cost to participate. Participants may be compensated for visits, follow-ups, and travel stipends.
